

AOK™ SWISS BALLS

UNIQUE DEVELOPMENT

All AOK Swiss Balls are made in Australia and are the result of a 10 year development program established with the University of Newcastle Materials Testing Laboratory. Our balls are tested for:

- Resistance to deformation under load.
- Static load tolerance (Hydraulic Press until failure).
- Dynamic load tolerance (Free weight assisted failure—punctured).

University of Newcastle

Each ball type provides a different feel and application as a “labile environment” for sports training, rehabilitation, home exercise and corporate seating.

Our major brands are mediBall/Duraball and are available in a range of colours and the 3 styles shown below:

CLASSIC

Sizes: 55cm, 65cm & 75cm

RTD: medium

Static Load: 1500 kg or 3300 lb

Dynamic Load: 375 kg or 825 lb

PRO

Sizes: 45cm, 55cm, 65cm, 75cm & 85cm

RTD: high

Static Load: 2000 kg or 4400 lb

Dynamic Load: 500 kg or 1100 lb

MAX

Sizes: 55cm, 65cm & 75cm

RTD: very high

Static Load: 2500 kg or 5500 lb

Dynamic Load: 750 kg or 1650 lb
