Disclaimer

Warning! Do not use our equipment without a complete understanding of its intended purpose and function. By using our equipment the user accepts full responsibility for all risks and injury and waives any right to themselves, their heirs, their executors or any part to hold the manufacturer or its representatives responsible for any direct or indirect damages whatsoever caused by use of this equipment. Only use AOK products in a safe clear area on a flat dry surface. Children must not play on this equipment unattended. Consult a physician before starting this or any exercise program.

Our Guarantee

Our product guarantee assures you 100% satisfaction. If it's not right, we'll make it right! Our friendly, helpful team will always do their best to make your experience with AOK Health a pleasant one.

Return Policy

Every item sold by AOK is unconditionally guaranteed free of faults.

If for any reason you should find our products unsatisfactory, you may return the product within 60 days (excluding DVDs, videos, books and courses). Before returning any product, please call customer service at 1300 790 900 for a Return Authorization (RA) number. No product will be accepted without a RA number. With the exception of shipping errors, refunds or credits will not be issued for shipping charges. Goods must be in as new condition with all packaging and instructions. It is your responsibility for return freight charges. Remember abuse or misuse may void your product warranty.

CAUTION - IMPORTANT WARNING

All balls like car tyres wear out with heavy use. If you use your ball in a commercial environment you may need to upgrade on a regular basis. mediBall® Pros are not indestructible and may be weakened or damaged by sharp objects which may result in the ball deflating. Do not use a mediBall® that has been damaged. Always keep your activity area clear of sharp objects or corners, and check your ball regularly. Go to www.mediball.com/ball-damage-warning-signs.asp

what size do i need?

| BALL SIZE | JUNIOR | SMALL | MEDIUM | LARGE | EXTRA LARGE |
|---|--------|-------------|-------------|-------------|-------------|
| MAX BALL DIAMETER diameter is the vertical height of the ball | 45cm | 55cm | 65cm | 75cm | 85cm |
| YOUR HEIGHT COMBO SIZING suitable for combined sitting and exercise | <150cm | 150 - 165cm | 162 - 183cm | 180 - 200cm | 198cm+ |
| EXER-SIZING suitable for mainly exercise | <160cm | 160 - 175cm | 175- 195cm | 195cm+ | |

Note: These sizes are only a guide. Larger/ Bulkier users may need a larger size ball than shown, purely for comfort and not biomechanics. You will rarely use a mediBall at its maximum inflated diameter. Best results at 90-95% inflation. Over inflation will void warranty. Do not use heavy weights on balls.

mediBall® Dynamics DVD

An instructional program providing a wide range of mediBall exercises. Each exercise is demonstrated and explained starting from the base position and moving through to the

more difficult progressions making it suitable for beginners to advanced users.

BOSU

The Bosu resembles an Exercise Ball that has been cut in half. It has a stable and an unstable side. This makes for a versatile piece of equipment which can be used for everything from cardio to rehab to yoga. With the ball side up, you can stand, squat, sit or use it just like you would a step for aerobics. When you exercise with the platform up, your body has to constantly shift and contract to stay aligned. Perfect for body balance.

\$110⁰⁰

Oov

Contoured Body Roller

This product works by activating the users core stabilising muscles while also gently extending the spine to stimulate healthy intervertebral disc lubrication.

This active response in the user helps achieve neutral spine, a widely used concept in the treatment and assessment of spinal conditions. From stretching to core strengthening to rehabilitation or for relaxation purposes, the Oov can be utilised with significant benefits for spinal health. The Oov can be readily applied in the fields of fitness, yoga, pilates, physiotherapy, osteopathy, chiropractics, even massage and stress relief.

australian made

Specific exercises and stretches have already been developed with the help of medical practitioners and trainers to address different specific body types, patterns and ailments.

EPP Rollers - 35+ SHORE C Hardness

Supplied with a stretching/exercise guide, these rollers are slightly harder than our EVA Physio Rollers. It is a high performance, professional roller made of the highest quality, Expanded Polypropylene foam.

EPP Foam Roller - Long Round 15cm x 90cm **\$49⁹⁵**

Thera Rolls - GO DEEPER!!

The patented "ribbed" design and manufacture of the Thera Roll is a potent variation on the traditional roller. It ensures an edge to the compression forces generated by the user's body weight and Thera Roll placement. This means increased penetration of the soft tissue. The ribbed surface also increases traction. Minimising the risk of 'sliding off'. This deep traction also assists the fascia to slide over adjacent tissue. Suitable for general soft tissue pain & stiffness, fascial restriction, active or latent myofascial trigger points or joint restriction.

Available 2 hardness levels 30 +/- 3 (purple) & 38 +/- 3 (grey) Shore C  Made in USA

resistance chair

Chair Exercise System - For Office or Home

The Resistance Chair was designed with one goal in mind—to make the safest and most convenient exercise system for mature adults. The Resistance Chair achieves this goal because of its innovative Resistance Anchor Cable™ system. With the Resistance Cables, you get a smooth, quiet resistance without using conventional weights.

PostureProp™

Removable backrest offers support for strength exercises and gives added range of motion for chest press routines.

Resistance Anchor Cable™

Patent pending Resistance Anchor Cable™ exercise cables provide a low-impact, convenient resistance system. Easy-to-change cables available in six different resistance levels (sold separately as value pack).

Lower Activity Bay

For bicep curls, lateral raises, bent rows and more.

Health Step™

Detachable step can be used as a footrest for improved balance during seated exercises, and attaches to the back of the chair for step exercises.

Balance Bar Handles

Provide balance support for leg exercises while standing behind chair.

Upper Activity Bay

Allows a wide range of upper body exercises, including chest press, shoulder press, tricep extensions, and more.

Anchor Assembly Base

Resistance Anchor Cable™ exercise cable easily snaps on and off so you can quickly change cable resistance levels.

Resistance Chair

Kettlebells - Steel

Professional grade kettlebells are used in all legitimate kettlebell championships and in training by all professional lifters. The ergonomics of the design allow a higher level of technique to be utilized without excessive forearm fatigue building up and they also prevent continual impact to the forearm. These factors are important if you perform high repetition style training. They are made from Steel, which is a far superior metal to iron, being less rust prone and also less brittle. The finish is a matt black paint. These kettlebells are the best available.

Kettlebells 8kg, 12kg, 16kg, 24kg & 32kg from **\$80⁰⁰**

Power breathe

The POWERbreathe Plus series offers a new hi-tech design, optimised airflow performance and anti-bacterial qualities. POWERbreathe Plus is a result of over 17 years of R&D at Birmingham, Loughborough and Brunel Universities – the UK’s leading Human Performance Research Universities. The POWERbreathe Plus series applies the principles of resistance training (pressure threshold training using a load calibrated spring) to strengthen the breathing muscles by making them work harder, in much the same way as you might use weights to increase the strength of your arm muscles.

DUMBELLS FOR YOUR DIAPHRAM

- Powerbreathe - Fitnes Plus (medium resistance)
- Powerbreathe - Sports Plus (Heavy resistance) **\$119⁰⁰**

trikke CV (cambering vehicle)

The Trikke CV is an innovative three-wheeled vehicle. A new machine in form, function, and riding experience. The patented technology lets you propel the Trikke forward without pushing or pedalling just via rythmic body movement.

TRIKKE 8

Trikking provides an activity with no impact stress to the spine and weight bearing joints. If you suffer from osteoarthritis and degenerative arthritis of the hips, knees and lower extremities, or have chronic back pain you may benefit from Trikking. The Trikke is used for rehabilitation post injury and post-operatively of musculoskeletal conditions such as long-bone fractures, sprain-strains, and neuromuscular re-education after prolonged immobilization or surgery.

TRIKKE 12

The Trikke CV is also an outstanding rehabilitation tool for patients that are deconditioned. The Trikke CV is a stable platform as compared to the traditional two-wheeled bicycle and it offers a better rehab experience than the stationary or recumbent bicycle.

- Trikke 8 Combo Air & PU_ 8 inch wheels **\$649⁰⁰**
- Trikke 12 Roadster_ 12 inch wheels **\$849⁰⁰**

Trikke 12 includes FREE CARRY BAG!

COR Bench

The COR Bench introduces an inflatable exercise surface that places greater demand on the neuromuscular system than a traditional flat bench.

The inflatable portion is puncture resistant, lightweight, and "green. The variation between this material and a typical exercise ball: its constructed of 400-denier nylon urethane, is significantly stronger, and very hard to puncture. Producing equipment that is environmentally friendly is important to us.

Whats the result? Our bench increases muscle activation by utilizing the core musculature (rectus abdominus, transverse abdominus, external / internal obliques, and the erector spinae group) to stabilize the bodys center of gravity. The new school of thought is that we should actually be encouraging anti-rotation while still activating the torso and obliques.

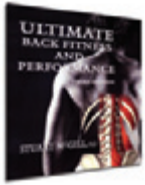

COR BENCH

**Change Your
Training Forever**

The Ultimate Back Assessment & Therapeutic Exercise DVD by Stuart McGill

This companion DVD illustrates techniques documented in Dr. McGill's textbooks. Using clinic settings and patients, McGill shows assessment skills to determine specific intolerances and therapeutic options. This is followed with exercise techniques allowing the painful back to engage in appropriate corrective exercise and progress to stabilisation/mobilisation, and endurance to prepare for strength.

Anatomy Trains Book & DVD (2nd Ed) by Thomas Myers

This is a must have book for all physiotherapists, bodyworkers and exercise scientists. Anatomy Trains using Myofascial Meridians provides a unique new map of the fascial connections through the muscles that leads to new understanding of the connectivity in the body, and directly to new therapeutic strategies, especially for long-standing compensatory patterns in client stance and movement.

How to Eat, Move and Be Healthy by Paul Chek

This is a MUST HAVE book! Each Person is unique! The way we respond to food, exercise and stress varies person-to-person just as much as our fingerprints. This book will identify the reader's individual needs and teach them how to address issues that may be preventing them from looking and feeling their best. It is ideal for all not just athletes. Paul Chek discusses research, uncovers controversies and provides practical suggestions for achieving peak vitality.

Stretching & Flexibility by Kit Laughlin

How to get the most out of this aspect of stretching is part of what the book is about. Whatever your interest in stretching, this book will provide the techniques you need, from the easiest exercises to the most difficult. It is organised into 15 lessons, plus an 'unnumbered' one which you can do anytime to check your progress.
